SECTION 9 Support Reference Tables 40

9.1 Common Issues Quick Reference	40
9.2 Warranty Type Summary	40

SECTION 1 Warranty Policy

This section explains how warranty coverage works for all products purchased through Zoro Store. It describes the different warranty types offered, how to register a product, how to file a claim, and what is and is not covered. Warranty terms vary by product category, so representatives should always confirm the specific product's warranty entry before advising a customer.

1.1 Standard Warranty

Every new product sold through Zoro Store includes a Standard Warranty that covers manufacturing defects and hardware failures that occur under normal use. The Standard Warranty begins on the date of delivery, not the date of order placement, and is automatically applied at checkout without any additional registration step.

- Duration: 12 months from the date of delivery for most electronics.
- Coverage: manufacturing defects, premature hardware failure, and non-functioning components.
- Proof of purchase: the original order confirmation email or invoice number is sufficient.
- Applies automatically; no separate sign-up is required at the time of purchase.

NOTE

The Standard Warranty period may differ by product category. Always check the product's listing page or the Warranty Reference Table in Section 9 for the exact duration before quoting a customer.

1.2 Extended Warranty

Customers may purchase an Extended Warranty plan at checkout or within 30 days of delivery. The Extended Warranty adds additional months of coverage on top of the Standard Warranty and, depending on the plan selected, may include accidental damage protection.

Plan Name	Additional Coverage	Accidental Damage	Typical Price Range
Extended Care 12	+12 months beyond standard	Not included	5-8% of product price
Extended Care 24	+24 months beyond standard	Not included	8-12% of product price
Extended Care Plus	+24 months beyond standard	Included (2 incidents/year)	12-18% of product price

BEST PRACTICE TIP

Recommend Extended Care Plus to customers purchasing high-value items such as laptops or gaming monitors, since accidental damage is one of the most common reasons customers contact support.

1.3 International Warranty

Products shipped internationally are covered by the International Warranty program, which mirrors the Standard Warranty terms but is fulfilled through Zoro Store's regional service partners. Customers located outside the

primary country of sale should reference this policy rather than the domestic Standard Warranty terms.

- Coverage duration matches the Standard Warranty period for the product category.
- Repairs may be completed by an authorized regional service partner rather than the original seller.
- Customers must provide the original international order number for verification.
- Cross-border shipping costs for warranty repairs are covered by Zoro Store; customs duties on replacement units, where applicable, are the customer's responsibility unless local law states otherwise.

1.4 Battery Warranty

Rechargeable batteries are considered consumable components and carry a separate, shorter warranty period than the host device, since batteries naturally degrade with charge cycles.

- Standard battery warranty: 6 months from delivery, or until the battery drops below 80% of its original rated capacity, whichever occurs first.
- Batteries that fail to hold any charge, swell, or fail to power on the device are covered.
- Gradual capacity loss from normal aging and daily use is expected behavior and is not a defect.

WARNING

A swollen battery is a safety hazard. If a customer reports a swollen or leaking battery, instruct them to stop using the device immediately, place it in a fireproof or ceramic container away from flammable materials, and avoid charging it further. Escalate this ticket as a Priority 1 safety case.

1.5 Accessory Warranty

Accessories such as cables, chargers, cases, and mounts included with a primary product, or sold separately, carry their own warranty terms that are typically shorter than the primary device.

Accessory Type	Warranty Duration	Common Failure Covered
Charging cables	6 months	Fraying, internal wire break, connector failure
Power adapters	12 months	No output, overheating, internal component failure
Cases and covers	3 months	Material defect, clasp or zipper failure
Mounts and stands	6 months	Structural defect, hinge or joint failure

1.6 Warranty Registration

While the Standard Warranty applies automatically, customers are encouraged to register their product in their Zoro Store account to speed up future claims and receive recall or safety notices.

- 1 Sign in to the Zoro Store account used for the purchase.
- 2 Navigate to Account > My Products.
- 3 Select the product and enter the serial number found on the device or original packaging.
- 4 Confirm the purchase date and upload the invoice if it was not an online order.
- 5 Save the registration; a confirmation email will be sent within a few minutes.

1.7 Warranty Claim Process

Customers filing a warranty claim should be guided through the following steps to ensure the claim is processed without delay.

- 1 Confirm the product is still within its applicable warranty period using the order date and warranty duration for its category.
- 2 Ask the customer to describe the issue and, where possible, provide photos or a short video.
- 3 Run any relevant basic troubleshooting steps from Section 8 before approving a claim, unless the issue is clearly hardware-related (e.g., physical failure, dead battery, no power).
- 4 Open a warranty claim ticket and attach the order number, serial number, and issue description.
- 5 Advise the customer of the expected outcome: repair, replacement, or store credit, and the estimated timeline.
- 6 Provide a prepaid return shipping label if the item must be sent in for inspection.

1.8 Warranty Verification

Before approving any claim, support staff must verify that the product is genuine, was purchased through an authorized channel, and falls within the warranty window.

- Match the serial number against the order record in the customer's account.
- Confirm the product was not purchased through an unauthorized third-party reseller.
- Check for any prior warranty claims on the same serial number to detect duplicate or fraudulent claims.
- Verify the reported issue is consistent with the symptoms typically associated with that failure type.

1.9 Warranty Transfer

Warranty coverage may be transferred to a new owner if the product is resold or gifted, provided the original purchase can still be verified.

- 1 The original purchaser submits a transfer request through Account > My Products > Transfer Ownership.
- 2 The new owner creates or uses an existing Zoro Store account and accepts the transfer invitation.
- 3 Zoro Store re-links the serial number and remaining warranty period to the new owner's account.
- 4 The original purchaser loses claim rights to the product once the transfer is confirmed.

NOTE

Extended Warranty plans are transferable along with the Standard Warranty. Accidental damage incidents already used under an Extended Care Plus plan carry over to the new owner's remaining count.

1.10 Replacement Under Warranty

A replacement unit is issued when a product cannot be economically repaired, when a repair would take longer than the maximum resolution time, or when the same defect recurs after a prior repair.

- Replacements are of the same model where available; if discontinued, a comparable or upgraded model is offered at no additional cost.

- The replacement unit carries the remainder of the original warranty period or a minimum of 90 days, whichever is longer.
- The original defective unit must be returned within 14 days of receiving the replacement, using the prepaid label provided.

1.11 Repair Under Warranty

Where a repair is possible and practical, Zoro Store will repair the product rather than replace it.

- 1 The customer ships the product to the designated service center using the prepaid label.
- 2 A technician diagnoses the fault and confirms whether it is covered under warranty.
- 3 If covered, the repair is completed at no cost; if not covered, the customer is notified with a repair quote before any chargeable work begins.
- 4 The repaired unit is tested and shipped back to the customer, along with a repair summary.

1.12 Warranty Exclusions

The following situations are not covered under any Zoro Store warranty plan:

- Cosmetic wear such as scratches, scuffs, or fading that does not affect function.
- Damage caused by accidents, drops, or misuse, unless covered by an Accidental Damage add-on plan.
- Damage from unauthorized repairs, modifications, or third-party parts.
- Damage caused by power surges from non-approved chargers or adapters.
- Software issues unrelated to a hardware defect, including data loss.
- Products with a removed, altered, or illegible serial number.
- Normal battery capacity degradation from age and use, as noted in Section 1.4.

1.13 Physical Damage Policy

Physical damage refers to cracks, dents, broken screens, or structural damage resulting from drops, impacts, or pressure. Physical damage is excluded from the Standard and Extended Warranty unless the customer has an active Accidental Damage plan.

- Customers with Extended Care Plus may file up to two accidental damage claims per 12-month period.
- A service fee may apply for accidental damage repairs, disclosed to the customer before work begins.
- Products without accidental damage coverage may still be repaired at the customer's expense; a quote will be provided after inspection.

1.14 Water Damage Policy

Water and liquid damage is generally excluded from warranty coverage unless the product is rated for water resistance and the damage occurred within its rated conditions.

- Products with an IP67 or IP68 rating are covered for damage from splashes or brief submersion within their rated depth and duration.
- Damage from submersion beyond the rated limit, exposure to non-water liquids (such as salt water, coffee, or cleaning chemicals), or products with no water resistance rating are not covered.

- A liquid contact indicator inside the device, if triggered, may be used by technicians to confirm liquid exposure during inspection.

1.15 Unauthorized Repair Policy

Opening, repairing, or modifying a product outside of a Zoro Store authorized service center voids all remaining warranty coverage on that unit.

WARNING

Do not offer warranty repair or replacement once evidence of third-party repair is confirmed, such as broken security seals, non-original components, or solder work not matching factory standards. Politely inform the customer that the warranty has been voided and offer a paid, out-of-warranty repair quote instead.

1.16 Warranty FAQs

Q: Does the warranty cover accidental drops?

A: Only if the customer has an active Accidental Damage add-on plan such as Extended Care Plus. The Standard and basic Extended Warranty do not cover accidental damage.

Q: Do I need to keep the original box for a warranty claim?

A: No, the original box is not required. The order number or registered serial number is sufficient proof of purchase and warranty eligibility.

Q: Can I get a refund instead of a repair under warranty?

A: Warranty claims are resolved through repair or replacement. Refunds are handled under the separate Returns & Refund Policy described in Section 2.

Q: What happens if my product is out of warranty?

A: You can still request a paid repair. Support will provide a quote after inspecting the product, and you may accept, decline, or request the item be returned unrepai red.

Q: Is the warranty valid if I bought the product second-hand?

A: Yes, provided the warranty has been transferred to your account using the Warranty Transfer process described in Section 1.9, or the original serial number is still within its coverage window.

SECTION 2 Returns & Refund Policy

This section outlines how customers can return products, exchange them, or request a refund. It covers eligibility, timelines, packaging requirements, and how to handle special situations such as wrong or damaged deliveries.

2.1 Return Eligibility

Most products are eligible for return provided the following conditions are met:

- The return request is submitted within the Return Window described in Section 2.2.
- The product is in its original condition, with all accessories, manuals, and packaging included.
- The product is not listed under Non-returnable Products in Section 2.9.
- For opened software licenses or activated digital codes, the item is not eligible unless defective.

2.2 Return Window

Product Category	Return Window	Condition Required
Laptops, tablets, monitors	15 days from delivery	Unused or like-new, original packaging
Smartphones, wearables	15 days from delivery	Unused or like-new, original packaging
Audio and accessories	30 days from delivery	Unopened or resalable condition
Home electronics and appliances	30 days from delivery	Unused, original packaging
Open box / clearance items	7 days from delivery	As described at time of sale

NOTE

The Return Window begins on the date of delivery confirmation, not the order date. If a delivery date cannot be confirmed, use the carrier's recorded delivery timestamp.

2.3 Replacement Policy

Customers who receive a defective or incorrect item may request a like-for-like replacement instead of a refund. Replacement requests are prioritized for shipping and typically dispatch within 1-2 business days of approval, subject to stock availability.

2.4 Exchange Policy

Exchanges for a different size, color, or model are permitted within the standard Return Window. The original item must be shipped back before or alongside the new item being dispatched, unless the customer opts to pay for the new item upfront and receive a refund on the returned item separately.

2.5 Refund Timeline

Stage	Typical Duration
Return received and inspected at warehouse	1-3 business days
Refund approved and processed by Zoro Store	1-2 business days
Funds returned to original payment method	3-7 business days (bank-dependent)
Store credit issued (if selected)	Instant to 24 hours

2.6 Damaged Product Returns

If a product arrives damaged, the customer should report it within 48 hours of delivery with photos showing the damage and the packaging it arrived in.

- 1 Confirm the damage is visible in the photos and consistent with shipping damage.
- 2 Offer a free replacement as the default resolution; offer a refund if the customer prefers.
- 3 Waive return shipping costs for damaged product cases.
- 4 Flag the shipment carrier and packaging type in the internal quality log for tracking.

2.7 Wrong Product Delivered

When a customer receives an item different from what they ordered, this is treated as a fulfillment error and resolved at no cost to the customer.

- Verify the discrepancy against the original order details.
- Arrange free return pickup of the incorrect item.
- Dispatch the correct item immediately, without waiting for the incorrect item to be received back.
- Apply a service recovery credit where the error caused significant inconvenience, per manager approval.

2.8 Missing Accessories

If a customer reports that an included accessory (charger, cable, manual, or bundled item) was missing from the package, verify the expected contents against the product listing and ship the missing item directly at no charge, without requiring the customer to return anything.

2.9 Open Box Products

Open Box products are previously returned or displayed items that have been inspected and resold at a discount. These carry a shortened return window as noted in Section 2.2 and are sold with any cosmetic imperfections clearly disclosed at the time of purchase.

2.10 Cancelled Orders

Orders can be cancelled free of charge as long as they have not yet entered the packing or shipping stage. Once an order has shipped, the customer must instead follow the standard return process after delivery.

- Orders in 'Processing' status: can be cancelled instantly through the account order page.
- Orders in 'Packed' status: cancellation may still be possible; contact support to attempt an intercept before dispatch.

- Orders in 'Shipped' status: cannot be cancelled; the customer should refuse delivery or initiate a return afterward.

2.11 Refund Methods

Refund Method	Processing Time	Notes
Original payment method	3-7 business days	Default method for most refunds
Store credit / Zoro Wallet	Instant	10% bonus credit offered as an optional alternative
Bank transfer	5-10 business days	Used when original payment method is unavailable
Gift card refund	Instant	Returned as gift card balance if originally paid by gift card

2.12 Refund Delays

If a refund has not appeared within the expected timeline, first confirm the refund was actually processed on the Zoro Store side before assuming a bank delay.

- 1 Check the refund status in the order management system.
- 2 If marked as processed, advise the customer that bank processing times vary and may take up to 10 business days depending on their card issuer.
- 3 If not yet processed, escalate to the Payments team for immediate action.
- 4 If more than 10 business days have passed with no resolution, escalate to Level 2 support.

2.13 Non-returnable Products

The following items cannot be returned once opened or activated, except in the case of a genuine defect:

- Digital gift cards and downloadable software licenses.
- Earbuds and in-ear audio devices, once the seal is broken, for hygiene reasons.
- Personal care electronics such as electric shavers or trimmers, once used.
- Custom or made-to-order products.
- Clearance items explicitly marked 'Final Sale' at checkout.

2.14 Return Process

- 1 Customer initiates the return request from Account > Order History > Return Item.
- 2 Customer selects a reason for the return and whether they want a refund, exchange, or replacement.
- 3 System generates a prepaid return shipping label (for eligible reasons) or a paid label link.
- 4 Customer packages the item per the Return Packaging Guidelines and drops it off or schedules a pickup.
- 5 Warehouse inspects the returned item and confirms eligibility.
- 6 Refund, exchange, or replacement is processed per the timelines above.

2.15 Pickup Process

For bulky items such as monitors or appliances, customers can schedule a home pickup instead of dropping the package off at a carrier location.

- Pickup can be scheduled for the next available business day in most serviceable areas.
- The customer does not need to pre-print a label; the pickup agent carries a printed label.
- The item should be sealed and ready at the time of the scheduled pickup window.

2.16 Return Packaging Guidelines

- Use the original box and inner packaging whenever available to prevent transit damage.
- Remove or cover any old shipping labels on the outside of the box.
- Include all original accessories, cables, and documentation.
- Wrap fragile items such as screens with additional protective padding.
- Affix the return label securely and keep the drop-off or pickup receipt until the refund is confirmed.

WARNING

Do not ship batteries or battery-powered devices with visible swelling or damage using standard return shipping. Contact support for special handling instructions, as damaged lithium batteries may be restricted from normal transport by carrier safety regulations.

2.17 Return FAQs

Q: Do I have to pay for return shipping?

A: Return shipping is free when the return is due to a defect, damage, or a fulfillment error. For change-of-mind returns, a standard return shipping fee may apply and will be deducted from the refund.

Q: Can I return an item without the original box?

A: In most cases yes, but the item must still be in resalable condition with all included accessories. Missing original packaging may result in a partial refund for a change-of-mind return.

Q: How do I know if my return was received?

A: You will receive an email notification once the warehouse scans and inspects the returned item, and the status will update in your order history.

Q: Can I exchange an item for a completely different product?

A: Exchanges are intended for the same product in a different variant. To switch to a different product entirely, return the original item for a refund and place a new order.

Q: What if my return is rejected during inspection?

A: You will be notified with the reason, such as missing accessories or signs of damage not disclosed at the time of return, and the item will be shipped back to you rather than refunded.

SECTION 3 Shipping & Delivery

This section describes available shipping methods, delivery timelines, and how to resolve common shipping issues such as delays, lost packages, or incorrect addresses.

3.1 Shipping Methods

Method	Description	Typical Delivery Time
Standard Shipping	Default free or low-cost option for most orders	4-7 business days
Express Shipping	Priority handling and faster transit	1-3 business days
Same-Day Delivery	Available in select metro areas for orders placed before cutoff	Same day
International Shipping	Cross-border delivery via regional partners	7-21 business days

3.2 Delivery Timelines

Delivery timelines are estimates based on the shipping method selected and the destination region. Timelines begin counting from the date an order is dispatched, not the order placement date. Orders placed after the daily processing cutoff are treated as being placed the next business day.

3.3 Express Shipping

Express Shipping is available at checkout for an additional fee and guarantees priority handling in the warehouse. If an Express order fails to arrive within the guaranteed window, the shipping fee is automatically refunded to the customer.

3.4 International Shipping

- Customs duties and import taxes, where applicable, are the responsibility of the recipient unless the order was placed under a delivered-duty-paid option.
- International tracking may show fewer updates than domestic tracking while the package is in customs clearance.
- Some products may be restricted from shipping to certain countries due to local regulations; restricted destinations are listed in Section 3.13.

3.5 Order Tracking

Customers can track their order from Account > Order History > Track Package, or using the tracking link sent by email once the order ships. Tracking information typically becomes active within 24 hours of dispatch.

3.6 Delayed Orders

- 1 Confirm the order has shipped and check the latest carrier tracking update.
- 2 If tracking has not updated in more than 3 business days, contact the carrier on the customer's behalf.

- 3 If the delay exceeds the maximum delivery window by more than 5 business days, offer the customer the choice of continuing to wait, a reshipment, or a full refund.
- 4 Document the delay reason in the ticket for logistics reporting.

3.7 Lost Shipments

A shipment is considered lost if tracking shows no movement for more than 10 business days domestically, or 21 business days internationally, with no reasonable explanation such as customs holds.

- Open a claim with the carrier while simultaneously offering the customer a reshipment or refund.
- Do not require the customer to wait for the carrier claim to resolve before receiving their resolution.
- Mark the ticket as a logistics loss for internal tracking and carrier performance review.

3.8 Damaged Deliveries

Handled under the Damaged Product Returns process in Section 2.6. Always request photos of both the product and the outer packaging to help identify whether the damage occurred in transit.

3.9 Incorrect Address

If a customer notices an incorrect shipping address after placing an order, act quickly since address changes are only possible before the order is packed.

- 1 Check the current order status immediately.
- 2 If still in Processing status, update the address directly in the order system.
- 3 If already Packed or Shipped, contact the carrier to request an address correction or package intercept; success is not guaranteed once the package has left the warehouse.
- 4 If the package is delivered to the wrong address and cannot be recovered, treat it as a lost shipment per Section 3.7, noting that the customer provided incorrect information.

3.10 Address Change

Customers may update their saved addresses at any time in Account > Address Book. This does not retroactively change the address on orders already placed; those must be updated individually while still in Processing status.

3.11 Failed Delivery Attempts

- Most carriers attempt delivery up to 3 times before returning a package to the local depot.
- Customers can typically reschedule a delivery attempt or arrange depot pickup directly with the carrier.
- Packages returned to Zoro Store after repeated failed attempts will be refunded, minus original shipping costs, unless the customer requests reshipment.

3.12 Delivery Charges

Order Value	Standard Shipping	Express Shipping
Below threshold	Flat fee applies	Flat fee plus express surcharge

Order Value	Standard Shipping	Express Shipping
Above free-shipping threshold	Free	Express surcharge only

NOTE

The free-shipping order value threshold varies by region and active promotions. Always confirm the current threshold in the regional pricing configuration rather than quoting a fixed figure from memory.

3.13 Shipping Restrictions

- Devices containing large lithium batteries (such as power stations) may be restricted from air freight to certain countries.
- Some regions restrict import of used or refurbished electronics.
- Orders to restricted destinations are flagged automatically at checkout with an explanation.

3.14 Shipping FAQs

Q: Can I change my shipping address after placing an order?

A: Yes, but only while the order is still in Processing status. Once it has been packed or shipped, the address can no longer be changed directly through your account.

Q: Why does my tracking number show no updates?

A: Tracking can take up to 24 hours to activate after dispatch, and international shipments may pause during customs clearance. If there is no update after several business days, contact support.

Q: Do you ship to P.O. boxes?

A: Standard Shipping supports most P.O. box addresses; Express and Same-Day Delivery generally require a physical street address.

Q: What happens if I'm not home for delivery?

A: The carrier will typically attempt redelivery or leave a pickup notice for the nearest depot, depending on local carrier policy.

Q: Can I request a specific delivery time?

A: Standard and Express Shipping do not support specific time-slot delivery, but Same-Day Delivery in eligible areas may offer a narrower delivery window.

SECTION 4 Payment Support

This section covers accepted payment methods and how to resolve common payment issues such as failed transactions, duplicate charges, and invoice requests.

4.1 Credit Cards

Major credit cards are accepted at checkout. Charges are authorized at the time of order and captured when the order ships. If an order is cancelled before shipping, the authorization is released rather than refunded, since no capture occurred.

4.2 Debit Cards

Debit cards are processed the same way as credit cards. Some banks may place a temporary hold on the account for the authorized amount, which is released automatically if the order is cancelled.

4.3 UPI

Unified Payments Interface transactions are processed instantly and capture funds immediately, since UPI does not support a separate authorization and capture step. Refunds for cancelled UPI orders are issued back to the originating UPI ID.

4.4 Net Banking

Net Banking payments route the customer to their bank's portal to complete authentication. If a session times out mid-transaction, the customer should check their bank statement before retrying, as the amount may have already been debited even if the order shows as failed.

4.5 Digital Wallets

Supported digital wallets allow customers to check out using a linked balance or card without re-entering payment details. Refunds are returned to the same wallet used for the original purchase.

4.6 Gift Cards

Zoro Store gift cards can be applied at checkout and combined with one other payment method. Gift card balances do not expire and can be checked at any time under Account > Gift Cards.

- Gift cards cannot be redeemed for cash except where required by local law.
- Lost gift card codes cannot be reissued unless the original purchase receipt is provided for verification.
- Partial gift card balances remain on the card for future use.

4.7 EMI (Installment Payments)

Eligible orders above a minimum value can be paid in fixed monthly installments through participating card issuers. Interest, if any, is determined by the issuing bank's EMI terms, not by Zoro Store.

NOTE

If an EMI order is returned or refunded, the refund is processed to the original card, and any already-billed installments are reversed by the issuing bank according to its own timeline, which Zoro Store does not control.

4.8 Cash on Delivery (COD)

COD is available for eligible orders and locations, allowing payment in cash or by card directly to the delivery agent. A COD verification call or SMS confirmation may be required for higher-value orders.

4.9 Payment Failed

- 1 Ask the customer whether an error message was displayed and note the exact wording if possible.
- 2 Confirm whether the amount was deducted from their account despite the failure message.
- 3 If funds were deducted, treat this as a Duplicate Payment case per Section 4.10.
- 4 If no funds were deducted, suggest retrying with the same or an alternate payment method.
- 5 If failures persist across multiple methods, escalate to the Payments team to check for a processor-side issue.

4.10 Duplicate Payment

Duplicate payments can occur when a customer resubmits an order after a slow or failed response from the payment gateway, even though the first attempt succeeded.

- 1 Confirm both charges in the payment processor dashboard using the order timestamps.
- 2 Verify only one valid order exists, or that the customer did not intend to place two separate orders.
- 3 Refund the duplicate charge in full within 1-2 business days.
- 4 Notify the customer with the expected timeline for the refund to reflect in their account.

4.11 Refund Pending

See Section 2.12 for the full Refund Delays process. Payment-specific refund pending cases should additionally confirm that the original payment method is still active and able to receive funds, particularly for cancelled or expired cards.

4.12 Payment Verification

Some orders are flagged for manual payment verification to prevent fraud, particularly for first-time customers placing high-value orders or using a shipping address that differs from the billing address.

- Verification may involve a confirmation call, email, or a request for a partial statement screenshot.
- Orders held for verification are not shipped until verification is complete or the hold is cleared.
- Verification holds are typically resolved within 24 hours of customer response.

4.13 Invoice Requests

Customers can download an invoice for any completed order from Account > Order History > Invoice. For business customers requiring a customized invoice format, support can generate one manually upon request.

4.14 Billing Errors

Billing errors include incorrect amounts charged, incorrect tax calculation, or charges for items not included in the order. Each case should be reviewed against the original order breakdown before issuing any correction.

- 1 Pull the original order summary and compare it against the amount actually charged.
- 2 Identify whether the discrepancy is due to tax, shipping, promotional codes, or a system error.
- 3 Issue a partial refund or additional charge correction as needed, with a clear explanation to the customer.

4.15 Tax Invoices

Tax invoices, including any applicable business tax identification numbers, are generated automatically for orders where the customer provided their tax details at checkout. Customers who forgot to add these details can request a corrected invoice within 30 days of the order date.

4.16 Payment FAQs

Q: Why was my card declined even though I have sufficient funds?

A: Declines can occur due to bank-side fraud checks, incorrect billing address entry, or temporary holds unrelated to available balance. Contacting your card issuer directly can often clarify the reason.

Q: How long does a refund take to reflect after approval?

A: Most refunds reflect within 3-7 business days, though this depends on your bank or card issuer's own processing schedule.

Q: Can I change my payment method after placing an order?

A: No, the payment method cannot be changed once an order is placed. You would need to cancel the order, if still eligible, and place a new one with the preferred payment method.

Q: Is it safe to save my card details on Zoro Store?

A: Saved card details are tokenized and stored securely by our payment processor; Zoro Store does not store full card numbers on its own systems.

Q: Why do I see two pending charges for one order?

A: This is often a temporary authorization hold alongside the actual charge. The hold is typically released automatically by your bank within a few business days.

SECTION 5 Customer Account Support

This section covers how customers manage their Zoro Store account, including login, security, and profile settings.

5.1 Account Creation

Accounts can be created using an email address and password, or through supported single sign-on providers. Email verification is required before the first order can be placed.

5.2 Login Issues

- 1 Confirm the customer is using the correct email address associated with their account.
- 2 Ask them to clear the browser cache or try a different browser or device.
- 3 Check the account status for any temporary lock due to repeated failed login attempts.
- 4 If locked, guide the customer through the Account Recovery process in Section 5.13.

5.3 Forgot Password

- 1 Direct the customer to the Forgot Password link on the login page.
- 2 Have them enter their registered email address to receive a reset link.
- 3 Reset links expire after 30 minutes for security; a new one can be requested if it lapses.
- 4 If no email arrives, check for typos in the entered address and confirm the spam or junk folder.

5.4 Email Verification

A verification email is sent immediately after account creation or after an email address change. If not received within a few minutes, the customer can request a new verification email from their account settings page.

5.5 Phone Verification

Adding a phone number enables SMS order updates and serves as a secondary recovery method. Verification codes are sent via SMS and expire after 10 minutes.

5.6 Profile Updates

Customers can update their name, email, phone number, and communication preferences under Account > Profile Settings. Email changes require re-verification of the new address before taking effect.

5.7 Address Management

Multiple shipping addresses can be saved under Account > Address Book, with one address marked as default. Saved addresses can be edited, removed, or renamed for easy identification at checkout.

5.8 Order History

All past and current orders are listed under Account > Order History, including status, tracking links, invoices, and options to initiate a return or reorder the same items.

5.9 Saved Payment Methods

Customers can securely save payment methods for faster checkout. Saved methods can be removed at any time and are automatically removed if a card expires.

5.10 Notification Settings

Order updates, promotional emails, and SMS alerts can each be toggled independently under Account > Notification Settings. Transactional notifications related to active orders, such as shipping confirmations, cannot be fully disabled while an order is in progress.

5.11 Delete Account

- 1 Customer submits a deletion request from Account > Privacy Settings > Delete Account, or via support.
- 2 Support confirms there are no active orders, open returns, or pending disputes on the account.
- 3 The account is scheduled for deletion, with a 14-day grace period during which the request can be cancelled by the customer.
- 4 After the grace period, personal data is deleted or anonymized in line with the Privacy Settings policy.

5.12 Privacy Settings

Customers can review what personal data is stored, download a copy of their data, and manage marketing consent preferences under Account > Privacy Settings.

5.13 Account Recovery

For accounts locked due to suspicious activity or where the customer has lost access to their registered email and phone, identity must be verified manually before access is restored.

- 1 Ask the customer for their account email, full name, and at least one recent order number.
- 2 Verify the order details against the account record, including delivery address and last four digits of the payment method used.
- 3 Once verified, issue a secure recovery link or manually reset access with the customer on the line.

WARNING

Never reset account access based on name and email alone. Always confirm at least one additional piece of order-specific information to reduce the risk of account takeover fraud.

5.14 Security Recommendations

- Use a unique password not reused from other websites.
- Enable two-factor authentication where available.
- Avoid saving payment details on shared or public devices.

- Log out of shared devices after each session.
- Report any unrecognized order or login activity to support immediately.

5.15 Customer FAQs

Q: Can I have two accounts with the same email address?

A: No, each email address can only be associated with one account. Attempting to register again with the same email will prompt a login instead.

Q: Why was my account temporarily locked?

A: Accounts are temporarily locked after multiple failed login attempts as a security measure. It unlocks automatically after a short period or can be reset via the Forgot Password flow.

Q: Can I merge two separate accounts?

A: Account merging is not automatic, but support can manually transfer order history from one account to another upon verified request.

Q: How do I stop receiving marketing emails?

A: Use the unsubscribe link at the bottom of any marketing email, or turn off promotional notifications in Account > Notification Settings.

Q: What happens to my data if I delete my account?

A: Personal data is deleted or anonymized after the 14-day grace period, in accordance with the Privacy Settings policy, though records required for legal or tax purposes may be retained separately.

SECTION 6 Technical Support Process

This section defines the internal structure of technical support, including support tiers, escalation rules, and service level agreements (SLAs) for response and resolution.

6.1 Level 1 Support

Level 1 Support handles general inquiries, order status questions, basic troubleshooting, and straightforward account or billing requests. Level 1 agents follow the troubleshooting decision trees in Section 8 before escalating a technical issue.

6.2 Level 2 Support

Level 2 Support handles issues that require deeper technical diagnosis, such as recurring hardware faults, complex warranty disputes, or multi-step account recovery. Level 2 agents have access to additional diagnostic tools and repair authorization limits.

6.3 Level 3 Engineers

Level 3 Engineers handle the most complex technical cases, including firmware-level defects, systemic product issues affecting multiple customers, and cases requiring direct coordination with the product engineering team.

6.4 Escalation Rules

- A ticket is escalated to Level 2 if Level 1 troubleshooting steps do not resolve the issue within two contact attempts.
- A ticket is escalated to Level 3 if it involves a suspected systemic defect, safety concern, or requires engineering input.
- Any case involving a safety hazard, such as a swollen battery or electrical fault, is escalated immediately regardless of tier, per Section 7.
- Escalations must include a full summary of steps already attempted to avoid repeating them with the customer.

6.5 Priority Levels

Priority	Definition	Example
P1 - Critical	Safety risk or complete service outage affecting many customers	Battery fire risk, payment system outage
P2 - High	Product completely non-functional for a single customer	Device will not power on
P3 - Medium	Partial functionality loss or moderate inconvenience	Wi-Fi drops intermittently
P4 - Low	Minor issue or general inquiry	Question about a feature

6.6 Ticket Status Meanings

Status	Meaning
Open	Ticket created, awaiting first response
In Progress	Agent is actively working the case
Pending Customer	Awaiting information or action from the customer
Escalated	Transferred to a higher support tier
Resolved	Issue addressed; awaiting customer confirmation
Closed	Case complete with no further action needed

6.7 Response Time SLA

Priority Level	First Response Time
P1 - Critical	Within 30 minutes
P2 - High	Within 4 hours
P3 - Medium	Within 1 business day
P4 - Low	Within 2 business days

6.8 Resolution Time SLA

Priority Level	Target Resolution Time
P1 - Critical	Within 24 hours
P2 - High	Within 3 business days
P3 - Medium	Within 5 business days
P4 - Low	Within 7 business days

6.9 Emergency Escalation

Emergency escalation applies to any case involving immediate risk to customer safety, such as a reported fire, smoke, burn injury, or electrical shock from a product.

WARNING

For any report of fire, smoke, sparking, or injury from a product, immediately advise the customer to stop use, disconnect power if it is safe to do so, and contact local emergency services if there is an active fire or injury. Escalate the ticket to Level 3 and safety review simultaneously, do not wait for standard escalation queues.

6.10 Customer Communication Guidelines

- Acknowledge the customer's issue before diving into troubleshooting steps.

- Use plain, non-technical language unless the customer demonstrates technical familiarity.
- Provide a clear next step and expected timeline at the end of every interaction.
- Avoid making promises about outcomes that have not yet been approved, such as guaranteed refunds before an inspection is complete.
- Always confirm the customer's issue is resolved before closing a ticket.

SECTION 7 Safety Guidelines

This section provides safety guidance for customers using electronic products and for support agents responding to safety-related reports.

7.1 Battery Safety

- Use only the charger and cable originally supplied or explicitly approved for the device.
- Avoid exposing batteries to temperatures above 45°C (113°F) or below 0°C (32°F) for extended periods.
- Do not puncture, crush, or disassemble a battery under any circumstance.
- Stop use immediately if a battery becomes swollen, hot, or emits an odor.

WARNING

A swollen or leaking battery should never be charged, used, or disposed of in household trash. Place it in a cool, non-flammable location away from combustible materials and contact support for safe disposal instructions.

7.2 Charging Safety

- Do not charge devices on soft surfaces such as beds or couches that can trap heat.
- Do not leave devices charging unattended overnight on a regular basis.
- Unplug chargers when not in use to reduce electrical load and wear.
- Inspect cables periodically for fraying, exposed wires, or damage before use.

7.3 Electrical Safety

- Do not use products with visibly damaged power cords or connectors.
- Avoid overloading a single power outlet or extension cord with multiple high-draw devices.
- Keep electronics away from standing water and damp environments.
- Ensure adequate ventilation around devices that generate heat during operation.

7.4 Water Damage

Most consumer electronics are not designed to withstand submersion or heavy liquid exposure unless explicitly rated for water resistance. If a device is exposed to liquid, power it off immediately, avoid charging it, and allow it to dry fully before attempting to power it back on.

7.5 Cleaning Electronics

- Power off and unplug the device before cleaning.
- Use a lightly dampened microfiber cloth; avoid spraying liquid directly onto the device.
- Avoid abrasive cleaners, solvents, or alcohol-based products on screens with anti-glare coatings.
- Allow all ports and vents to fully dry before reconnecting power.

7.6 Storage Guidelines

- Store devices in a cool, dry place away from direct sunlight.
- For long-term storage, charge batteries to approximately 50% rather than 0% or 100%.
- Avoid stacking heavy objects on top of stored electronics.

7.7 Temperature Guidelines

Most electronics operate safely between 0°C and 35°C (32°F to 95°F). Operating outside this range may cause performance throttling, shortened battery life, or in extreme cases, permanent damage.

7.8 Travel Recommendations

- Carry spare batteries and power banks in carry-on luggage rather than checked baggage where required by airline policy.
- Use a surge-protected adapter when traveling to regions with different voltage standards.
- Keep devices in padded cases during transit to reduce impact damage.

7.9 Children Safety

- Keep small accessories such as earbud tips and cable ends away from young children due to choking hazards.
- Supervise children's use of electronics near water or while charging.
- Consider parental control and screen-time features available on applicable devices.

7.10 Recycling Electronics

Electronics should never be disposed of in general household waste. Many regions require electronic waste to be dropped off at designated recycling centers or returned to the manufacturer.

7.11 Electronic Waste Disposal

- Check local regulations for approved electronic waste (e-waste) collection points.
- Some Zoro Store distribution centers accept old devices for recycling when a new purchase is delivered.
- Batteries should be recycled separately from the host device wherever local facilities allow it.

BEST PRACTICE TIP

When closing a support case involving a replaced or repaired device, remind customers about responsible e-waste disposal options for their old unit.

SECTION 8 Troubleshooting Decision Trees

This section provides structured troubleshooting workflows for common product categories. Each guide follows the same format: symptoms, possible causes, step-by-step resolution, preventive measures, when to escalate to support, and an estimated resolution time. Agents should follow these steps in order before escalating a ticket.

8.1 Laptop

Laptop Will Not Power On

Symptoms:

- Device does not turn on when the power button is pressed
- No lights, fan activity, or display response

Possible Causes:

- Fully depleted battery
- Faulty power adapter or cable
- Loose internal battery connection
- Failed power button or motherboard fault

Step-by-Step Resolution:

- 1 Connect the laptop to power using the original adapter and let it charge for at least 30 minutes.
- 2 Try a hard reset by holding the power button for 15-20 seconds with the charger connected.
- 3 Test with a different known-working outlet.
- 4 If available, try an alternate compatible charger to rule out a faulty adapter.
- 5 Check for any charging indicator light on the laptop or adapter.

Preventive Measures:

- Avoid letting the battery fully deplete on a regular basis.
- Use only the original or an approved replacement charger.
- Keep the charging port free of dust and debris.

NOTE

When to Contact Support: If the laptop shows no response after 30 minutes of charging and a hard reset, or if the charger shows no output on a multimeter check, escalate for warranty repair evaluation.

Estimated Resolution Time: 1-2 business days for remote diagnosis; 5-10 business days if a physical repair is required.

Laptop Overheating

Symptoms:

- Device becomes very hot to the touch
- Fan runs at high speed constantly
- Unexpected shutdowns during use

Possible Causes:

- Blocked air vents
- Dust buildup in internal cooling components

- Running processor-intensive tasks for extended periods
- Degraded thermal paste on older units

Step-by-Step Resolution:

- 1 Ensure the laptop is on a hard, flat surface that does not block the air vents.
- 2 Close unnecessary background applications and browser tabs.
- 3 Use compressed air to gently clean visible vents while powered off.
- 4 Check for pending system or driver updates that may address performance issues.
- 5 Allow the device to cool down fully before resuming use if it has shut down from heat.

Preventive Measures:

- Use a laptop stand or cooling pad for extended sessions.
- Clean vents periodically, especially in dusty environments.
- Avoid using the laptop on soft surfaces like beds or blankets.

NOTE

When to Contact Support: If overheating continues after cleaning and reducing workload, or if the device shuts down repeatedly, escalate for internal inspection.

Estimated Resolution Time: Same-day for basic cleaning guidance; 3-5 business days if internal repair is needed.

8.2 Smartphone

Smartphone Battery Drains Quickly

Symptoms:

- Battery percentage drops faster than expected
- Device feels warm during normal use

Possible Causes:

- Background apps consuming excessive power
- Screen brightness set too high
- Aging battery with reduced capacity
- Faulty app or system process

Step-by-Step Resolution:

- 1 Check battery usage statistics in device settings to identify high-drain apps.
- 2 Lower screen brightness or enable adaptive brightness.
- 3 Restart the device to clear any stuck background processes.
- 4 Update the device software and all apps to the latest version.
- 5 If the issue persists, test in safe mode to rule out third-party app conflicts.

Preventive Measures:

- Keep apps updated to benefit from efficiency improvements.
- Avoid extreme temperatures which accelerate battery wear.
- Use manufacturer-approved chargers only.

NOTE

When to Contact Support: If battery health reports below 80% capacity within the warranty period with no misuse, escalate for a battery warranty claim.

Estimated Resolution Time: Same-day for software-based fixes; 3-7 business days for battery replacement.

Smartphone Will Not Charge

Symptoms:

- No charging indicator when plugged in
- Charging is extremely slow or intermittent

Possible Causes:

- Debris in charging port
- Damaged cable or adapter
- Software glitch
- Faulty charging port

Step-by-Step Resolution:

- 1 Inspect the charging port for lint or debris and clean gently with a soft brush if needed.
- 2 Try a different cable and adapter to isolate the faulty component.
- 3 Restart the device.
- 4 Check if the device charges via a different charging method, such as wireless, if supported.

Preventive Measures:

- Use a port cover or case with port protection in dusty environments.
- Avoid yanking the cable at an angle when unplugging.
- Use certified cables and adapters only.

NOTE

When to Contact Support: If the device does not charge with a confirmed working cable and adapter, escalate for hardware inspection.

Estimated Resolution Time: 1-2 business days for remote diagnosis; 5-7 business days for physical repair.

8.3 Wireless Earbuds

Earbuds Will Not Pair

Symptoms:

- Device cannot locate earbuds in Bluetooth settings
- Pairing repeatedly fails or times out

Possible Causes:

- Earbuds already paired to another device
- Bluetooth cache issue on the host device
- Low earbud battery
- Case or earbuds not in pairing mode

Step-by-Step Resolution:

- 1 Ensure earbuds are charged above 20 percent.
- 2 Place earbuds back in the case, close the lid for 10 seconds, then reopen to reset the connection state.
- 3 Enter pairing mode following the specific button or case-open gesture for the model.
- 4 Remove the earbuds from the Bluetooth list on the host device and re-pair from scratch.
- 5 Test pairing with a second device to isolate whether the issue is with the earbuds or the original host device.

Preventive Measures:

- Keep earbud and case firmware updated via the companion app where available.
- Avoid pairing with more than a few devices to reduce Bluetooth connection conflicts.
- Store earbuds in the case when not in use to keep them charged and ready.

NOTE

When to Contact Support: If pairing fails on multiple devices after a factory reset of the earbuds, escalate for hardware evaluation.

Estimated Resolution Time: Same-day for pairing resets; 5-7 business days if a replacement is needed.

One Earbud Has No Sound

Symptoms:

- Audio plays only from one earbud
- Volume is noticeably imbalanced between sides

Possible Causes:

- Debris blocking the speaker mesh
- Software balance setting skewed
- One earbud not fully seated in the case for charging
- Hardware fault in one unit

Step-by-Step Resolution:

- 1 Check the device's audio balance setting and reset it to center.
- 2 Clean the speaker mesh gently with a dry, soft brush.
- 3 Ensure both earbuds are fully charged by confirming charging indicators in the case.
- 4 Reset both earbuds to factory settings and re-pair.
- 5 Swap earbuds between ears to confirm whether the issue follows the earbud or the ear.

Preventive Measures:

- Clean earbuds regularly to prevent wax and debris buildup.
- Ensure both earbuds seat fully in the charging case after each use.

NOTE

When to Contact Support: If one earbud consistently produces no or distorted sound after cleaning and a factory reset, escalate for a warranty replacement of the affected unit.

Estimated Resolution Time: Same-day for cleaning and reset; 5-7 business days for replacement.

8.4 Wi-Fi Router

No Internet Connectivity

Symptoms:

- Devices connect to Wi-Fi but show no internet access
- Intermittent or dropped connections

Possible Causes:

- ISP outage
- Router firmware issue
- Overloaded network with too many connected devices
- Incorrect router configuration after a recent change

Step-by-Step Resolution:

- 1 Confirm whether the internet outage affects wired devices as well as wireless ones.
- 2 Power cycle the router and modem: unplug both for 30 seconds, plug in the modem first, wait for it to fully reconnect, then plug in the router.
- 3 Check for a firmware update in the router's admin panel.
- 4 Reduce the number of connected devices temporarily to test for network overload.
- 5 Reset the router to factory settings as a last resort before escalating.

Preventive Measures:

- Keep router firmware updated regularly.
- Position the router in a central, open location away from thick walls and interference sources.
- Restart the router periodically, such as monthly, to clear memory buildup.

NOTE

When to Contact Support: If connectivity issues persist after a factory reset and confirmed ISP service is active, escalate for hardware evaluation.

Estimated Resolution Time: Same-day for configuration fixes; 5-7 business days for hardware replacement.

8.5 Monitor

No Display Signal

Symptoms:

- Monitor shows 'No Signal' message
- Screen remains black despite device being powered on

Possible Causes:

- Loose or faulty video cable
- Incorrect input source selected
- Graphics card or output port issue on the connected device
- Monitor power issue

Step-by-Step Resolution:

- 1 Confirm the monitor is set to the correct input source (HDMI, DisplayPort, etc.).
- 2 Check that the video cable is firmly connected at both ends.
- 3 Test with a different cable if available.

- 4 Connect the monitor to a different device to determine if the issue is with the monitor or the original source device.
- 5 Restart both the monitor and the connected device.

Preventive Measures:

- Use high-quality, undamaged cables rated for the monitor's resolution and refresh rate.
- Avoid repeatedly bending cables at sharp angles near the connectors.

NOTE

When to Contact Support: If the monitor shows no signal across multiple cables and source devices, escalate for hardware inspection.

Estimated Resolution Time: Same-day for cable and settings checks; 5-7 business days for hardware replacement.

8.6 Printer

Printer Not Printing

Symptoms:

- Print jobs stay in queue without printing
- Printer shows offline status

Possible Causes:

- Printer disconnected from network or USB
- Outdated or corrupted print driver
- Paper jam or empty paper tray
- Print queue stuck with a failed job

Step-by-Step Resolution:

- 1 Check that the printer is powered on and connected to the network or via USB.
- 2 Clear the print queue and cancel any stuck jobs.
- 3 Restart the printer and the connected computer.
- 4 Reinstall or update the printer driver from the official product page.
- 5 Check for paper jams and ensure paper is properly loaded.

Preventive Measures:

- Keep printer drivers and firmware updated.
- Use recommended paper types and weights.
- Avoid overfilling the paper tray beyond its marked capacity.

NOTE

When to Contact Support: If the printer remains offline or fails to print after a driver reinstall, escalate for hardware evaluation.

Estimated Resolution Time: Same-day for driver and queue fixes; 5-7 business days for hardware repair.

8.7 Keyboard

Keys Not Responding

Symptoms:

- One or more keys fail to register input
- Keyboard is unresponsive entirely

Possible Causes:

- Debris under the keys
- Loose USB or wireless dongle connection
- Outdated keyboard driver or firmware
- Low battery on wireless models

Step-by-Step Resolution:

- 1 Check the connection: reseat the USB cable or wireless dongle.
- 2 Replace batteries or recharge if using a wireless keyboard.
- 3 Test the keyboard on a different device to isolate the issue.
- 4 Clean gently around affected keys using compressed air.
- 5 Update keyboard drivers or firmware if available.

Preventive Measures:

- Avoid eating or drinking directly over the keyboard.
- Clean the keyboard periodically with compressed air.
- Store wireless keyboards with adequate battery charge.

NOTE

When to Contact Support: If specific keys remain unresponsive after cleaning and a driver update, escalate for a warranty replacement.

Estimated Resolution Time: Same-day for connection and cleaning fixes; 5-7 business days for replacement.

8.8 Mouse

Cursor Not Moving or Skipping

Symptoms:

- Cursor freezes, jumps, or does not move smoothly
- Clicks are not registering consistently

Possible Causes:

- Dirty sensor lens
- Incompatible or unsuitable surface
- Low battery on wireless models
- Driver or firmware issue

Step-by-Step Resolution:

- 1 Clean the sensor lens on the underside of the mouse with a dry cloth.
- 2 Try using the mouse on a different surface, ideally a mouse pad.
- 3 Replace or recharge the battery if wireless.
- 4 Reconnect the USB receiver or Bluetooth connection.
- 5 Update the mouse driver or firmware if available.

Preventive Measures:

- Use a mouse pad on glass or highly reflective surfaces.
- Keep the sensor area clean and free of dust.
- Avoid letting battery levels run critically low before recharging.

NOTE

When to Contact Support: If cursor issues persist across different surfaces and after cleaning, escalate for hardware evaluation.

Estimated Resolution Time: Same-day for cleaning and surface fixes; 5-7 business days for replacement.

8.9 Gaming Controller

Controller Drift or Unresponsive Buttons

Symptoms:

- Analog stick input registers movement without touch (drift)
- Buttons feel unresponsive or double-register

Possible Causes:

- Dust or debris under analog stick module
- Worn internal potentiometer
- Outdated controller firmware
- Low battery affecting input accuracy

Step-by-Step Resolution:

- 1 Recalibrate the controller through the connected device or console settings.
- 2 Clean around the base of the analog sticks with compressed air.
- 3 Update the controller firmware if an update is available.
- 4 Charge the controller fully and test again.
- 5 Test the controller on a different device to confirm the issue is with the controller itself.

Preventive Measures:

- Avoid excessive force on analog sticks during use.
- Keep the controller firmware updated.
- Store the controller in a clean, dry environment.

NOTE

When to Contact Support: If drift persists after calibration and cleaning, escalate for a warranty replacement, as this typically indicates internal component wear.

Estimated Resolution Time: Same-day for calibration; 5-7 business days for replacement.

8.10 SSD (Solid State Drive)

Drive Not Detected

Symptoms:

- SSD does not appear in the device's storage list

- Device fails to boot from the SSD

Possible Causes:

- Loose cable or connector
- Incorrect drive format for the operating system
- Drive failure
- Outdated storage controller drivers

Step-by-Step Resolution:

- 1 Check that all cables and connections are firmly seated.
- 2 Test the SSD in a different port or, for external drives, a different cable.
- 3 Check the device's disk management utility to see if the drive is detected but not initialized.
- 4 Update storage controller drivers.
- 5 Test the SSD in a different computer if possible to isolate the fault.

Preventive Measures:

- Avoid disconnecting an SSD while it is actively being read or written to.
- Keep a regular backup of important data as a general precaution.
- Ensure adequate power supply for external SSD enclosures.

NOTE

When to Contact Support: If the SSD is not detected on any port or system, escalate for a warranty evaluation of the drive.

Estimated Resolution Time: 1-2 business days for diagnosis; 5-7 business days for replacement.

8.11 Power Bank

Power Bank Not Charging Devices

Symptoms:

- Connected devices do not charge or charge very slowly
- Power bank indicator lights behave unexpectedly

Possible Causes:

- Power bank itself is not charged
- Faulty or incompatible cable
- Output port malfunction
- Internal battery degradation

Step-by-Step Resolution:

- 1 Charge the power bank fully using its original cable and check indicator lights during charging.
- 2 Try a different cable to rule out a cable fault.
- 3 Test each output port individually if the power bank has more than one.
- 4 Test charging a different device to isolate whether the issue is the power bank or the original device.
- 5 Check for a reset button or method specific to the model.

Preventive Measures:

- Avoid letting the power bank fully deplete for long periods without recharging.
- Store in a cool, dry place away from direct sunlight.

- Use the original or manufacturer-approved cables.

NOTE

When to Contact Support: If the power bank fails to charge or output power after testing with multiple cables and devices, escalate for a warranty evaluation.

Estimated Resolution Time: Same-day for basic checks; 5-7 business days for replacement.

SECTION 9 Support Reference Tables

This section consolidates key reference tables from across the manual into a single quick-lookup location for support agents.

9.1 Common Issues Quick Reference

Issue	Possible Cause	Solution	Escalate?	Est. Resolution
Device won't power on	Depleted battery / faulty adapter	Charge 30 min, try alternate charger	If unresolved	1-2 days
Battery drains fast	Background apps / aging battery	Check usage stats, update software	If below 80% health in warranty	Same day - 7 days
No internet access	Router/ISP issue	Power cycle router and modem	If persists after reset	Same day - 7 days
Item arrived damaged	Shipping mishandling	Photo evidence, free replacement	Rarely	1-3 days
Payment failed	Bank decline / gateway issue	Retry or alternate method	If persistent across methods	Same day
Refund not received	Bank processing delay	Verify processed status, wait for bank	If over 10 business days	3-10 days
Login not working	Wrong credentials / account lock	Password reset, verify identity	If account compromised	Same day
Controller drift	Analog stick wear/debris	Calibrate, clean, update firmware	If persists	Same day - 7 days

9.2 Warranty Type Summary

Warranty Type	Coverage	Duration
Standard Warranty	Manufacturing defects, hardware failure	12 months
Extended Care 12	Standard coverage extension	+12 months
Extended Care 24	Standard coverage extension	+24 months
Extended Care Plus	Extension + accidental damage (2/yr)	+24 months
International Warranty	Same as Standard, via regional partner	12 months
Battery Warranty	Failure to charge/hold power, swelling	6 months
Accessory Warranty (cables)	Fraying, connector failure	6 months
Accessory Warranty (adapters)	No output, overheating	12 months

9.3 Refund Method Summary

Refund Method	Processing Time
Original payment method	3-7 business days
Store credit / Zoro Wallet	Instant
Bank transfer	5-10 business days
Gift card refund	Instant

9.4 Shipping Method Summary

Shipping Method	Delivery Time
Standard Shipping	4-7 business days
Express Shipping	1-3 business days
Same-Day Delivery	Same day (select areas)
International Shipping	7-21 business days

9.5 Priority Level & SLA Summary

Priority Level	First Response Time	Target Resolution Time
P1 - Critical	Within 30 minutes	Within 24 hours
P2 - High	Within 4 hours	Within 3 business days
P3 - Medium	Within 1 business day	Within 5 business days
P4 - Low	Within 2 business days	Within 7 business days

SECTION 10 Frequently Asked Questions

This section provides a comprehensive set of frequently asked questions organized by topic, intended to support both customers and AI-assisted retrieval systems in quickly locating accurate answers.

10.1 Warranty

Q: How do I know what warranty applies to my product?

A: Check the product listing page or your order confirmation email, which states the applicable warranty duration for that category.

Q: Does moving to another country affect my warranty?

A: Your warranty remains valid, but service may be provided under the International Warranty terms through a regional partner rather than the original seller.

Q: Is a warranty void if I install third-party software?

A: No, installing standard third-party software does not void hardware warranty coverage unless it involves unauthorized firmware modification.

Q: Can I extend my warranty after the original purchase?

A: Yes, Extended Warranty plans can be added within 30 days of delivery.

Q: Will a warranty claim affect my ability to return the item?

A: No, warranty claims and returns are separate processes and do not interfere with each other, provided the return window has not already passed.

Q: Does the warranty cover software updates that cause issues?

A: Software-related issues unrelated to a hardware defect are generally not covered, but support can still help troubleshoot them.

Q: What documents do I need for a warranty claim?

A: Your order number or registered serial number is typically sufficient; no additional documents are required in most cases.

Q: Can I request warranty service at a physical location?

A: Availability of physical service centers depends on your region; support can confirm the nearest option during your claim.

Q: Does warranty cover a product bought during a clearance sale?

A: Yes, unless explicitly marked as a Final Sale item excluded from returns, which does not affect warranty eligibility.

Q: How long does a typical warranty repair take?

A: Most repairs are completed within 5-10 business days after the item is received at the service center.

Q: Can I check my warranty status online?

A: Yes, under Account > My Products, provided the item has been registered.

Q: Is proof of purchase required if I registered my product?

A: Registration typically eliminates the need for a separate proof of purchase, since the order is already linked to your account.

Q: Does the warranty transfer automatically when gifting a product?

A: No, the original purchaser must initiate a formal Warranty Transfer request.

Q: What if my product warranty expired a few days ago?

A: Support may still review the case; some near-expiry issues reported shortly after expiration may be considered on a case-by-case basis.

10.2 Returns

Q: Can I return a gift I received?

A: Yes, gifted items can be returned using the order number if available, or through a gift return process if you do not have order access.

Q: What if I missed the return window by a day or two?

A: Contact support; minor exceptions may be considered depending on the circumstances, though this is not guaranteed.

Q: Can I return only part of a multi-item order?

A: Yes, individual items within an order can typically be returned independently.

Q: Do I need original packaging to return a product?

A: It is preferred but not always mandatory; the item must still be in resalable condition.

Q: How do I print a return label?

A: A prepaid or paid label link is generated automatically after submitting your return request online.

Q: Can I return an item bought with store credit?

A: Yes, and the refund will typically be issued back as store credit unless otherwise requested.

Q: What if the return box gets lost by the carrier?

A: Keep your drop-off receipt; support can investigate with the carrier if the return does not arrive as expected.

Q: Can I cancel a return request after submitting it?

A: Yes, as long as the item has not yet been shipped back or picked up.

Q: Is there a fee for returning an item I simply don't like?

A: A standard return shipping fee may apply for change-of-mind returns, deducted from the refund.

Q: Can I return a product purchased using a promotional discount?

A: Yes, though the refunded amount will reflect the price actually paid after the discount.

Q: What happens if a returned item is missing an accessory?

A: The refund may be adjusted to account for the missing accessory's value, or the item may be sent back to you.

Q: Can I get a replacement instead of my money back?

A: Yes, replacement is offered as an alternative to a refund for eligible returns.

Q: Do open-box items have the same return policy?

A: Open Box items follow a shortened 7-day return window as noted in Section 2.2.

Q: Can someone else drop off my return for me?

A: Yes, as long as they have the return label and the packaged item.

10.3 Refunds

Q: Why is my refund less than what I paid?

A: This may occur if a return shipping fee applies, or if a promotional discount reduced the originally paid amount.

Q: Can I get a refund in cash for a card purchase?

A: No, refunds are returned to the original payment method used for the purchase.

Q: How do I check my refund status?

A: Refund status is visible under Account > Order History next to the relevant order.

Q: Can I choose store credit instead of a refund to my card?

A: Yes, and an optional bonus credit percentage may apply as an incentive.

Q: What happens if my card expired before the refund was issued?

A: Contact support; the refund can typically be redirected to bank transfer or a new saved payment method.

Q: Are shipping charges refunded along with the product price?

A: Original shipping charges are refunded only for defective, damaged, or incorrect items; not for change-of-mind returns.

Q: Can a refund be split across two payment methods?

A: If the original order was paid using two methods, the refund is generally split proportionally in the same way.

Q: How long do I have to dispute a refund amount?

A: Discrepancies should be reported within 30 days of the refund being issued for the fastest resolution.

Q: Does a refund cancel my warranty on the product?

A: Yes, once an item is refunded and returned, it is no longer eligible for warranty coverage.

Q: Can I get a partial refund without returning the item?

A: In select cases, such as minor cosmetic issues, a partial refund without a return may be offered at support's discretion.

Q: Why does my refund show as pending?

A: It typically means the amount has left Zoro Store's system but has not yet been posted by your bank.

Q: Is there a minimum order value for a refund to be processed?

A: No, refunds are processed regardless of order value.

Q: Can refunds be expedited?

A: Store credit refunds are instant; refunds to original payment methods follow standard bank processing times that cannot be expedited by Zoro Store.

Q: What if I never received the item but was still charged?

A: This is treated as a lost shipment; a refund or reshipment will be offered once verified.

10.4 Shipping

Q: Can I combine multiple orders into one shipment?

A: Orders placed separately are generally shipped separately, even if placed close together.

Q: Do you offer weekend delivery?

A: Availability depends on the carrier and region; some Express and Same-Day options include weekend delivery.

Q: Can I pick up my order instead of having it delivered?

A: Pickup availability depends on whether a local distribution point is offered in your area.

Q: Why did my package arrive earlier than the estimated date?

A: Estimates are a range; carriers sometimes deliver ahead of schedule depending on route efficiency.

Q: Can I ship to a different country than my billing address?

A: Yes, provided the destination is not on the shipping restrictions list.

Q: Do you provide signature-required delivery?

A: This can be requested for high-value orders; contact support to add this option before dispatch.

Q: What if I live in a remote area with limited carrier service?

A: Delivery times may be longer than standard estimates; support can provide a more specific estimate for your area.

Q: Can I track multiple packages from one order together?

A: If an order ships in multiple parcels, each will have its own tracking number listed under the same order.

Q: What if the tracking shows delivered but I never received it?

A: Report this within 48 hours; support will investigate with the carrier and offer a resolution.

Q: Can I change my delivery instructions after shipping?

A: Some carriers support instruction changes such as leaving a package with a neighbor; availability varies by carrier.

Q: Is insurance included on shipments?

A: Standard shipments include basic loss and damage coverage as part of Zoro Store's shipping policy.

Q: Can I request eco-friendly packaging?

A: Packaging materials are chosen for product protection; specific eco-packaging requests are not currently guaranteed but are noted for review.

Q: Do international orders include tracking?

A: Yes, though tracking detail may vary once the package enters another country's customs system.

Q: What if my package was damaged by customs inspection?

A: This is treated the same as a damaged delivery; report it with photos for a replacement or refund.

10.5 Payments

Q: Can I pay using two different cards?

A: Split payments across two cards are not supported at checkout; a single primary method plus a gift card or wallet balance is supported instead.

Q: Why do I need to verify my payment for a large order?

A: Large or first-time orders may be flagged for manual verification as a fraud prevention measure.

Q: Can I remove a saved card from my account?

A: Yes, under Account > Saved Payment Methods.

Q: Do you accept international cards?

A: Most internationally issued major cards are accepted, subject to your bank's own cross-border transaction policies.

Q: Is there a surcharge for using EMI?

A: Any interest or processing fee for EMI is determined by the issuing bank, not by Zoro Store.

Q: Can I use a gift card and a discount code together?

A: Yes, gift cards can typically be combined with promotional discount codes on the same order.

Q: What happens if my EMI order is returned midway through installments?

A: The refund is processed to your card, and the bank reverses future installments per its own policy.

Q: Can I split COD payment between cash and card?

A: This depends on the delivery agent's available payment terminal; check availability during checkout for COD orders.

Q: Why was my UPI payment charged but the order shows failed?

A: This can happen due to a delayed confirmation from the bank; the amount will be automatically refunded within a few business days if the order did not go through.

Q: Can I get a receipt immediately after payment?

A: Yes, an order confirmation with payment summary is generated instantly, and a full invoice is available shortly after in your account.

Q: Do you support recurring or subscription payments?

A: Support depends on the specific product or service; check the individual product page for subscription payment details.

Q: Is my payment information shared with sellers?

A: No, full payment details are not shared; only confirmation of successful payment is passed along internally.

Q: Can I use a corporate card for personal orders?

A: Yes, as long as the card is valid and authorized by the customer for use.

Q: What if my bank blocks the transaction as suspicious?

A: Contact your bank to authorize the transaction, then retry the payment on Zoro Store.

10.6 Accounts

Q: Can I change my registered email address?

A: Yes, under Account > Profile Settings, followed by verification of the new address.

Q: Why do I keep getting logged out automatically?

A: This can occur due to browser cookie settings or an extended period of inactivity for security reasons.

Q: Can I use social login instead of a password?

A: Yes, where supported single sign-on providers are enabled for account access.

Q: How do I add a second phone number for verification?

A: Only one primary phone number can be verified at a time under Account > Profile Settings.

Q: Can I have separate addresses for billing and shipping?

A: Yes, these can be set independently under Account > Address Book.

Q: What happens to my saved cards if I change my password?

A: Saved cards remain unaffected by a password change.

Q: Can I download all my personal data?

A: Yes, under Account > Privacy Settings > Download My Data.

Q: Is there a way to pause notifications temporarily?

A: Yes, notification preferences can be toggled off and on at any time under Notification Settings.

Q: Can I recover a deleted account after the grace period?

A: No, once the grace period has passed and deletion is finalized, the account cannot be recovered.

Q: Why does the app ask me to verify my identity again?

A: This may occur after a password reset, a new device login, or suspicious activity detection.

Q: Can I have a business account separate from my personal account?

A: Yes, business accounts can be created using a separate email address and may include additional invoicing features.

Q: How do I update my default shipping address?

A: Under Account > Address Book, select an existing address and mark it as default.

Q: Can I see my past login activity?

A: Yes, recent login activity is visible under Account > Privacy Settings > Security Log.

Q: What should I do if I suspect unauthorized account access?

A: Change your password immediately and contact support to review recent account activity.

10.7 Repairs

Q: How do I know if a repair is covered by warranty?

A: Support will confirm coverage during the claim verification step described in Section 1.8.

Q: Can I choose to have my item repaired instead of replaced?

A: Where technically feasible, repair is offered as an option alongside replacement.

Q: What if my item breaks again after a repair?

A: A recurring issue after a completed repair is typically escalated for a replacement rather than a second repair attempt.

Q: Do I get a loaner device during a repair?

A: Loaner devices are not standard but may be offered for select high-value items depending on availability.

Q: Can I track the status of my repair?

A: Yes, repair status updates are visible under your ticket or order history.

Q: Will data be erased during a repair?

A: Data loss is possible during certain repairs; customers are advised to back up data beforehand whenever possible.

Q: How much does an out-of-warranty repair cost?

A: Costs vary by product and issue; a specific quote is provided after inspection.

Q: Can I decline a repair after receiving a quote?

A: Yes, you may decline and request the item be returned to you, typically at no additional charge for the inspection.

Q: Is repair shipping free?

A: Shipping is free for in-warranty repairs; out-of-warranty repair shipping costs may apply depending on the case.

Q: Can I request expedited repair service?

A: Priority repair handling may be available for an additional fee where offered.

Q: What if a part needed for my repair is out of stock?

A: Support will notify you of the delay and offer a replacement or refund if the wait exceeds a reasonable timeframe.

Q: Do repaired items come with a new warranty?

A: Repaired items retain the remainder of the original warranty, with a minimum coverage period applied to the specific repaired component.

Q: Can I request the return of the faulty part after repair?

A: This depends on the component and safety considerations; ask your support agent for specifics.

Q: How do I know my item was repaired and not just tested?

A: Repair tickets include a summary of work performed, which is provided when the item is shipped back.

10.8 Replacement

Q: How is a replacement different from a repair?

A: A replacement provides an entirely new or refurbished-to-standard unit instead of fixing the original device.

Q: Can I request a different color for my replacement unit?

A: Replacements are typically issued in the same configuration as the original; alternate configurations depend on stock availability.

Q: Do I need to send back the old item before receiving a replacement?

A: In most cases, the replacement ships first, followed by return of the original unit within 14 days.

Q: What if I don't return the original item after replacement?

A: A charge for the value of the unreturned item may be applied if it is not returned within the specified window.

Q: Can I get a refund instead of a replacement?

A: Yes, this can typically be requested at the time the replacement is offered.

Q: Is a replacement unit brand new?

A: Replacement units are new or certified refurbished to full working standard, depending on availability.

Q: How long does it take to receive a replacement?

A: Replacements typically dispatch within 1-2 business days of approval.

Q: Does a replacement reset my return window?

A: No, the original return window applies to the order as a whole, not restarted by a replacement.

Q: What if the replacement also arrives defective?

A: This is escalated immediately as a priority case for further investigation and a different resolution path, such as a refund.

Q: Can I request a replacement for a product that is now discontinued?

A: A comparable or upgraded model will be offered at no additional cost.

Q: Do accessories need to be included when returning for replacement?

A: Yes, all original accessories should be included with the returned unit.

Q: Can I get a replacement shipped to a different address?

A: Yes, you may request a different address at the time the replacement is arranged.

Q: Is there a limit to how many times I can request a replacement?

A: Repeated replacement requests for the same recurring issue may prompt a deeper investigation or an alternate resolution such as a refund.

Q: Will I be notified when my replacement ships?

A: Yes, a shipping confirmation and tracking number will be sent automatically.

10.9 Accessories

Q: Can I buy a replacement charger separately?

A: Yes, individual accessories are available for purchase through the accessories section of the store.

Q: Are third-party accessories covered under warranty?

A: No, only accessories sold directly by Zoro Store are covered under the Accessory Warranty.

Q: What if my case doesn't fit my device properly?

A: This can be reported as a defect or sizing issue and is eligible for return within the standard return window.

Q: Can I get a spare cable under warranty if mine frays?

A: Yes, provided the cable is within its 6-month Accessory Warranty period.

Q: Do bundled accessories have the same warranty as the main product?

A: No, bundled accessories follow the shorter Accessory Warranty terms described in Section 1.5.

Q: Can I return an accessory if I bought the wrong size?

A: Yes, as long as it is unused or in resalable condition and within the return window.

Q: Are screen protectors covered under warranty?

A: Screen protectors are considered consumable and are generally not covered under warranty unless defective out of the box.

Q: Can I request extra cables with my order?

A: Additional cables can be purchased separately; they are not included beyond the standard bundled quantity.

Q: What if an accessory is missing from a bundle deal?

A: Report this immediately; the missing item will be shipped at no charge as described in Section 2.8.

Q: Do wireless charging pads have a separate warranty?

A: Yes, they generally follow the Power Adapter warranty terms of 12 months.

Q: Can I exchange an accessory color after opening the box?

A: Yes, subject to the standard return and exchange window, provided the item is in resalable condition.

Q: Are car mounts covered if the clasp breaks?

A: Yes, structural defects such as a broken clasp are covered under the Accessory Warranty for mounts and stands.

Q: Can I buy accessories compatible with older discontinued products?

A: Availability depends on stock; support can confirm compatibility and availability for older models.

Q: Is there a warranty on protective travel cases?

A: Yes, a 3-month warranty applies for material defects such as broken zippers or clasps.

10.10 Technical Support

Q: How do I contact technical support?

A: Technical support can be reached through live chat, email, or phone as listed on the Contact Us page.

Q: What information should I have ready before contacting support?

A: Your order number, product serial number, and a description of the issue will help speed up the process.

Q: Can I request a callback instead of waiting on hold?

A: Yes, a callback option is typically available during high-volume periods.

Q: How do I escalate a ticket that hasn't been resolved?

A: Ask your current support agent to escalate, or request a supervisor review if you feel the issue requires further attention.

Q: Can I get support for a product bought secondhand?

A: Yes, though warranty-based support requires a completed Warranty Transfer as described in Section 1.9.

Q: Is remote diagnostic support available?

A: Yes, for select software and configuration issues, an agent may offer a remote-assisted troubleshooting session with your consent.

Q: What are your support hours?

A: Standard support hours and any 24/7 availability for critical issues are listed on the Contact Us page.

Q: Can I follow up on a ticket via email?

A: Yes, replying directly to your ticket confirmation email will update the same support case.

Q: Do you offer support in multiple languages?

A: Language availability depends on the support channel and region; check the Contact Us page for current options.

Q: How do I know my ticket priority level?

A: Your ticket confirmation will indicate its assigned priority level as described in Section 6.5.

Q: Can I request the same agent for a follow-up?

A: This is not guaranteed, but ticket history and prior context are always available to any agent who picks up your case.

Q: What if I disagree with a support decision?

A: You can request a supervisor review, and the case will be reassessed with additional context.

Q: Is there a self-service troubleshooting option?

A: Yes, the troubleshooting decision trees in Section 8 mirror the guidance used by live agents.

Q: Can I attach photos or videos to a support ticket?

A: Yes, most support channels allow file attachments to help illustrate the reported issue.

10.11 Customer Services

Q: How do I provide feedback about my support experience?

A: A feedback survey is sent after most support interactions, or feedback can be shared directly with any agent.

Q: Can I speak with a manager directly?

A: Yes, you may request to speak with a supervisor at any point during a support interaction.

Q: Do you offer loyalty or rewards programs?

A: Program availability varies by region; check the Rewards section of your account for current offers.

Q: How do I file a formal complaint?

A: Formal complaints can be submitted through the Contact Us page and are reviewed by a dedicated resolutions team.

Q: Can I request compensation for a poor experience?

A: Service recovery credits may be offered at support's discretion for significant inconvenience caused by an error.

Q: Is there a way to track all my past support tickets?

A: Yes, under Account > Support History, all past and current tickets are listed.

Q: How long does it take to get a response to a complaint?

A: Formal complaints are typically acknowledged within 2 business days and resolved per the applicable SLA in Section 6.

Q: Can I request updates in a specific language?

A: Where multilingual support is available, you may request updates in your preferred supported language.

Q: Do you offer support for business or bulk orders?

A: Yes, business accounts have access to a dedicated support channel for bulk order inquiries.

Q: How can I confirm a support agent's identity?

A: Support agents can provide a verified employee ID or ticket reference number upon request.

Q: Can I request my ticket history be deleted?

A: Ticket history can be deleted upon request in line with the Privacy Settings policy, subject to any legal retention requirements.

Q: What is the best way to reach support urgently?

A: For urgent or safety-related issues, phone or live chat is recommended over email due to faster response times.

Q: Can I provide suggestions for new products or features?

A: Yes, product suggestions can be submitted through the feedback form on the Contact Us page.

Q: Is customer support available on public holidays?

A: Limited support, particularly for critical and safety issues, remains available on public holidays; standard hours may be reduced.

SECTION 11 Glossary

This glossary explains common technical and support-related terms in simple, customer-friendly language, intended to help non-technical readers understand terminology used throughout this manual.

Authorization Hold

A temporary reservation of funds on your card when you place an order, released if the order is cancelled before it ships.

Accidental Damage Protection

An optional warranty add-on that covers drops, spills, and similar mishaps not normally covered by standard warranty.

Battery Cycle

One full charge from 0% to 100%, used to measure how much a battery has been used over its lifetime.

Battery Health

A percentage showing how much of a battery's original capacity remains compared to when it was new.

Bluetooth Pairing

The process of connecting a wireless device, like earbuds, to a phone or computer for the first time.

Bookmark (Document)

A saved reference point in a digital document or file, unrelated to store warranty bookmarks.

Carrier

The shipping company responsible for delivering your package, such as a postal service or courier.

Cash on Delivery (COD)

A payment option where you pay in cash or by card when the package is delivered to you.

Chargeback

A reversal of a card payment initiated by your bank, usually due to a dispute.

Charging Cycle

See Battery Cycle.

Clearance Item

A product sold at a reduced price, often with limited stock and sometimes a shortened return window.

Customs Clearance

The process by which an international shipment is inspected and approved by a country's border authority.

Data Backup

A saved copy of your files and settings, useful in case a device is reset, repaired, or replaced.

Default Address

The address automatically selected at checkout unless you choose a different saved address.

Delivery Window

The estimated date range during which a package is expected to arrive.

Digital Wallet

An app or service that stores your payment details for faster checkout, such as a mobile pay service.

Dispatch

The point at which an order leaves the warehouse and begins its journey to you.

Domestic Shipping

Delivery within the same country as the shipping origin.

Duty (Import Duty)

A tax charged by a country's government on goods brought in from abroad.

EMI (Equated Monthly Installment)

A way to pay for a purchase in fixed monthly payments instead of all at once.

End of Life (Product)

A stage where a product is no longer manufactured or actively supported with new parts.

Escalation

When a support case is passed to a more experienced team because it needs deeper attention.

Express Shipping

A faster, often paid, delivery option that arrives sooner than standard shipping.

Factory Reset

Restoring a device to its original settings, erasing personal data and configurations.

Firmware

Built-in software that controls how a device's hardware operates.

Fulfillment

The process of picking, packing, and preparing an order for shipment.

Gift Card Balance

The remaining unused value on a gift card.

Grace Period

A set amount of time before an action, like account deletion, becomes permanent.

Hard Reset

Forcing a device to restart, often used to fix a device that has become unresponsive.

IP Rating

A standardized rating showing how resistant a device is to dust and water, such as IP67.

Invoice

A detailed billing document listing what was purchased, the price, and taxes applied.

Level 1 Support

The first point of contact for support issues, handling general and common requests.

Level 2 Support

A more specialized support team handling issues that need deeper technical review.

Level 3 Engineers

Highly specialized technical staff who handle the most complex product issues.

Lithium-ion Battery

A common rechargeable battery type used in most modern electronics.

Loaner Device

A temporary replacement device provided while your original item is being repaired.

Lost Shipment

A package that cannot be located or delivered after being dispatched.

Manufacturing Defect

A flaw in a product that existed when it was made, rather than caused by later use or damage.

Net Banking

An online payment method that connects directly to your bank account through its website.

Non-returnable Item

A product that cannot be sent back for a refund or exchange once opened or used, except if defective.

Open Box Product

An item that was previously returned or displayed and is resold at a discount after inspection.

Order Confirmation

An email or notification confirming that your order was successfully placed.

Order History

A record of all your past and current orders in your account.

Original Packaging

The manufacturer's box and inner materials the product was originally shipped in.

Out of Warranty

A product for which the warranty coverage period has already ended.

Pairing Mode

A special mode that makes a wireless device discoverable for connecting to another device.

Payment Gateway

The technology that securely processes your payment when you check out.

Payment Verification

An additional check performed to confirm a payment is legitimate before an order ships.

Pickup Process

Arranging for a courier to collect a return directly from your location.

Priority Level

A ranking (such as P1 to P4) used internally to determine how urgently a support case is handled.

Proof of Purchase

Any document or record, such as an order number, that confirms you bought a product.

Refund

Money returned to you after a return or cancellation.

Refurbished Product

A previously used or returned product that has been restored to full working condition.

Repair Quote

An estimated cost provided before performing a paid, out-of-warranty repair.

Replacement Unit

A new or refurbished item sent to you in place of a defective one.

Reseller

A third party that sells products on behalf of, or separately from, the original manufacturer or store.

Resolution Time

The amount of time it takes to fully resolve a reported issue.

Response Time

The amount of time it takes for a support agent to first reply to your inquiry.

Restocking

The process of returning inventory back into the warehouse system after inspection.

Return Window

The period of time during which you're allowed to send a product back.

RMA (Return Merchandise Authorization)

An approval number issued before returning a product, confirming the return has been accepted.

Rooting / Jailbreaking

Modifying a device's operating system beyond manufacturer restrictions, which can void warranty coverage.

Safety Recall

An official notice asking customers to stop using and return a product due to a discovered safety issue.

Same-Day Delivery

A shipping option where the order arrives on the same day it was placed, in eligible areas.

Sensor Lens (Mouse)

The small optical component on the underside of a mouse that tracks movement.

Serial Number

A unique code assigned to a specific product unit, used to verify warranty and registration.

Service Center

A facility authorized to perform repairs and inspections on products.

Service Level Agreement (SLA)

An internal commitment describing how quickly a support issue will be responded to or resolved.

Shipping Label

A printed or digital tag with delivery information attached to a package.

Shipping Restriction

A rule preventing certain products from being shipped to specific regions.

Single Sign-On (SSO)

Logging into an account using an existing account from another trusted service.

SSD (Solid State Drive)

A type of storage device that saves data using flash memory instead of spinning disks.

Standard Shipping

The default, typically slower and lower-cost delivery option.

Store Credit

A balance you can use for future purchases instead of receiving money back.

Surge Protector

A device that helps protect electronics from sudden increases in electrical voltage.

Swollen Battery

A battery that has physically expanded, usually a sign of internal damage or failure, and a safety hazard.

Tax Invoice

A formal invoice that includes tax details, often needed for business expense records.

Thermal Paste

A compound used inside devices to help transfer heat away from internal components.

Ticket (Support Ticket)

A recorded case created when you contact support, used to track your issue until resolution.

Ticket Status

The current stage of a support ticket, such as Open, In Progress, or Resolved.

Tracking Number

A unique code used to follow a package's journey from dispatch to delivery.

Two-Factor Authentication (2FA)

An extra security step requiring a second form of verification beyond just a password.

UPI (Unified Payments Interface)

An instant payment system that transfers money directly between bank accounts using a linked ID.

Verification Code

A one-time code sent by email or SMS to confirm your identity.

Warranty

A promise from the seller or manufacturer to repair or replace a product if it fails under normal use within a set period.

Warranty Claim

A formal request to have a product repaired or replaced under warranty terms.

Warranty Exclusion

A specific situation or type of damage that a warranty does not cover.

Warranty Registration

Linking a purchased product to your account to simplify future warranty claims.

Warranty Transfer

Moving warranty coverage from the original purchaser to a new owner.

Water Resistance Rating

See IP Rating.

Wireless Charging

Charging a device by placing it on a compatible pad, without a physical cable connection.

Wi-Fi Router

A device that creates a wireless network in your home or office to connect to the internet.

Zoro Wallet

An internal store credit balance customers can use for purchases and refunds.

Account Recovery

The process of regaining access to an account after being locked out or losing access credentials.

Address Book

A saved list of shipping and billing addresses in your account.

Bundle

A set of products, such as a device and accessories, sold together, often at a discount.

Compatibility

Whether a product or accessory is designed to work correctly with another specific device.

Cross-border Shipping

Delivery of goods from one country to another.

Duplicate Payment

An accidental second charge for the same order, usually refunded once identified.

Final Sale

A label indicating an item cannot be returned or exchanged, except if defective.

Inspection (Return)

The quality check performed on a returned item before a refund or exchange is approved.

Notification Preferences

Your chosen settings for which alerts and updates you receive, and through which channel.

Order Status

The current stage of your order, such as Processing, Packed, or Shipped.

Verification Hold

A temporary pause on an order while payment or identity details are being confirmed.
